

Yogi Makadiya

yogimakadiya3@gmail.com | Redmond, WA | linkedin.com/in/yogibm | yogimy03.github.io

Full-stack Software Engineer with M.Eng in Cybersecurity (UMD, GPA 3.93). Builds production APIs, scalable cloud systems, and developer tooling. Targeting SDE related roles where engineering ownership and reliability matter.

EXPERIENCES

Software Engineer - DevSecOps

Sep 2025 – Present

CuraJoy

- Owned end-to-end delivery of 10+ production features across React frontend, RESTful APIs, and databases, taking features from requirements through production deployment while maintaining a consistent release cadence as the product scaled.
- Increased platform reliability by migrating cloud infrastructure on AWS, integrating application monitoring and alerting, and resolving production incidents proactively to keep the system stable as the user base grew.
- Automated CI/CD pipelines using Docker and GitHub Actions, eliminating manual release steps and reducing deployment errors, enabling the team to ship faster with fewer rollbacks.

Software Engineer Intern - DevSecOps

Jan 2023 – Jun 2023

Double Slash Internet Pvt Ltd

- Integrated security protocols and automation into CI/CD pipelines for 4+ back-end services, improving deployment speed by 30% and reducing post-release defects by 40% through automated test gates and code quality checks.
- Built Python/Flask dashboards for real-time monitoring of assets and system metrics, implementing role-based access control and data protection best practices to secure sensitive operational data.

Cloud Developer Intern

Feb 2021 – Jan 2022

Seatizen, Start-up incubated at PDPU IIC

- Implemented and tuned object detection algorithms for resource-constrained embedded systems, improving inference accuracy by 15% through model optimization, then deployed the pipelines to Google Cloud with Firestore for scalable low-latency processing and led hardware selection across multiple edge GPU platforms.

PROJECTS

LLM-Powered Code Review Agent | *Python, FastAPI, Anthropic API, Docker, GitHub Actions*

- Built an AI agent to analyze GitHub pull requests and post structured security and correctness feedback as automated review comments, reducing manual review overhead by 60%. Integrated with the GitHub REST API to post inline comments at specific line positions, with diff chunking to handle large pull requests within LLM context limits.

ResidentEase Apartment Management System | *React, Node.js, PostgreSQL, JWT*

- Developed a secure web-based apartment management system with features for managing rent, maintenance requests, and event scheduling. Deployed security measures, including encryption and user authentication, to protect resident data. Conducted threat modeling and secure code reviews, ensuring data safety and system reliability.

Classification on Juvenile Delinquency | *Python, Scikit-learn, Pandas, Matplotlib*

- Applied classification techniques on demographic and socioeconomic datasets, achieving 96% accuracy in identifying high-risk areas for juvenile delinquency. Cleaned and analyzed large datasets to surface trends and derive actionable insights for targeted policy interventions. Built visual summaries and reports to communicate findings clearly to stakeholders.

TECHNICAL SKILLS

- Programming & Scripting:** C++, Java, Python, C#, Shell, SQL, NoSQL, JavaScript, HTML/CSS, Typescript
- Frameworks & Platforms:** React, ASP.NET, Flask, Django, Linux/UNIX, Windows, Firestore
- Cloud & DevOps:** AWS, Azure, Docker, Kubernetes, Jenkins, Ansible, Apache, Git
- Security & Tools:** Digital Forensics, Secure Systems, Nmap, Wireshark, Splunk, PowerShell, Google Chronicle

EDUCATION

University of Maryland

Aug 2023 – May 2025

M.Eng, Cybersecurity, GPA 3.93/4.00

College Park, Maryland, USA

- Received the 2024 ISC2 Graduate Scholarship for academic excellence and dedication to cybersecurity studies.

Pandit Deendayal Energy University

Aug 2019 – May 2023

B.Tech, Computer Engineering, GPA 9.72/10.00

Gandhinagar, Gujarat, India

- Coursework:** Distributed Systems, Cloud Infrastructure, Information Security, Machine Learning Applications

PUBLICATIONS
